

DHANUSHA D

Python Django Developer | Digital Marketer

dhanushakallunkal@gmail.com | +91 9995318400 | linkedin.com/in/dhanusha23 | Kerala, India

PROFESSIONAL SUMMARY

Motivated and self-driven Python Django Developer with hands-on experience in building dynamic web applications. Developed multiple projects including an Expense Tracker system, an E-commerce Shopping Website, and an AI Chat Web Application. Strong foundation in backend development, authentication systems, CRUD operations, REST APIs, and database integration. Certified in both Django Development and Digital Marketing with additional expertise in Meta Ads, Google Ads, SEO, and SMM. Passionate about writing clean, scalable code and eager to contribute to real-world development projects.

TECHNICAL SKILLS

Programming: Python

Frameworks: Django, Bootstrap

Frontend: HTML, CSS, JavaScript

Database: MySQL, SQLite

Tools: Git, GitHub, VS Code

Digital Marketing: Meta Ads, Google Ads, SMM, WordPress, SEO

AI Tools: ChatGPT, Claude, Gemini, Grok, Grammarly, Quillbot

WORK EXPERIENCE

Web Developer / Digital Marketer

Feb 2026 – Present IPM Digitals — India

- Developed and maintained dynamic web applications using Python and Django framework
- Implemented user authentication, CRUD operations, and database integration using MySQL
- Managed digital marketing campaigns on Meta Ads and Google Ads to drive traffic and conversions
- Optimized website SEO and handled social media management (SMM) for clients
- Collaborated with team to deliver client projects on time with clean, scalable code

Junior Executive / Coordinator

Aug 2025 – Jan 2026 Axis Bank — India

- Coordinated banking operations and assisted customers with account management and queries
- Handled data entry, documentation, and reporting with high accuracy
- Supported team in achieving monthly targets and maintaining customer satisfaction

PROJECTS

E-Commerce Shopping Website | Python | Django | HTML | CSS | MySQL | JavaScript

- Developed a fully responsive e-commerce platform with product catalog and search functionality
- Implemented user authentication, shopping cart, and order management system
- Integrated MySQL database for product and user data management

Personal Expense Tracker | Python | Django | HTML | CSS | Matplotlib | SQLite

- Built a Django-based expense management system with user authentication and secure login
- Implemented full CRUD operations for tracking income and expenses with category filtering
- Generated visual reports and charts using Matplotlib for spending analysis

AI Chat Web Application | *Python | Django | HTML | CSS | MySQL | JavaScript*

- Developed an AI-powered chat application to generate intelligent, context-aware responses
- Integrated AI API for real-time user interactions and dynamic response generation
- Built a clean chat UI with Django backend handling session management and message history

Bee — Affiliate Product Review Website | *Python | Django | HTML | CSS | MySQL | JavaScript | Cloudinary*

- Built a mobile-first affiliate marketing website hosted at shopwithbee.pythonanywhere.com
- Implemented two-button navigation per product — one redirecting to affiliate product listing on platforms like Amazon, second linking directly to product review video on YouTube channel
- Integrated Cloudinary for cloud-based image serving optimized for fast mobile loading
- Designed exclusively for mobile users with responsive UI, touch-friendly layout and fast page performance
